

MY COMMITMENT TO BRAMPTON

6 PRIORITIES. CLEAR ACTIONS. PUBLIC RESULTS.

A practical action plan explaining how I would turn my six campaign priorities into measurable work at Brampton City Council and Peel Regional Council.

1 Lower Property Taxes & Cut Waste	2 Safer Streets & Safer Neighbourhoods
3 Improve Public Transit & Reduce Traffic	4 Dignity & Better Care for Our Seniors
5 Better Healthcare for Our Community	6 Affordable Housing, Good Jobs & Opportunities

Sameer Tandon

Regional Councillor Candidate - Wards 2 & 6, Brampton

Prepared September 2026

How I will turn commitments into action

A Regional Councillor serves on Brampton City Council and also has responsibilities at Peel Regional Council. That matters because many everyday services are divided between the City and the Region. Some priorities - such as hospital operations and GO service - also require action from the Province, William Osler Health System or Metrolinx.

Current context: Brampton’s Council Handbook describes Regional Councillors as City Council members who also carry duties at Peel Region. Brampton identifies regional responsibilities including housing, police, public health, regional roads, social services, waste, water and wastewater. [Sources 1-2]

THE FIVE TOOLS I WOULD USE	
1	Budget decisions Review spending, propose changes and vote on City and Regional budgets.
2	Motions & amendments Bring practical proposals to Council and seek recorded decisions.
3	Staff reports Require costs, options, timelines, legal authority and measurable outcomes before major decisions.
4	Public accountability Use dashboards, milestones and service standards so residents can see whether commitments are moving.
5	Advocacy & partnerships Work with the Province, Metrolinx, Osler, police governance and community partners when the decision is outside direct municipal control.

MY ACCOUNTABILITY COMMITMENT

Every six months, I would publish a simple six-priority progress report showing what moved, what is delayed, what it cost, who is responsible and what the next action is.

- A STANDARD I WILL APPLY TO MAJOR DECISIONS**

 - Is it needed and supported by evidence?
 - Is the full cost affordable - including future operating costs?
 - Can residents see a measurable service benefit?
 - Who has the legal authority to deliver it?
 - How will progress be reported publicly?

1

IMPLEMENTATION PLAN

LOWER PROPERTY TAXES & CUT WASTE

MY COMMITMENT

I will work to lower the municipal property-tax burden by cutting waste and low-value spending first, protecting essential services, and using verified savings to reduce pressure on future City and Regional tax increases.

HOW I WILL ACT

- Push for a line-by-line review of major discretionary spending, consultant contracts, overtime, vacant positions, duplicated work and repeated project overruns.
- Require major new spending proposals to show full lifecycle cost, funding source and a measurable public benefit - not only the first-year price.
- Publish a clear savings and waste-reduction report showing verified savings, cost avoidance, major contract changes and projects that are over budget or late.
- Protect core services such as transit, fire, roads, parks and frontline Regional services while challenging spending that cannot demonstrate value.

FIRST 100 DAYS IN OFFICE

- Request a City/Region report on the largest controllable cost increases and major consultant/professional-service spending.
- Ask for a three-year budget-versus-actual review of departments and projects with repeated variances.
- Bring forward a public reporting standard for savings, major change orders and capital-project overruns.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Savings	Verified savings and cost avoidance before service cuts	Annual savings report
Spending	Major consultant and discretionary increases explained	Contract / budget summary
Projects	Fewer material budget and schedule overruns	Quarterly capital status
Taxes	Clear explanation of City and Region tax impacts	Recorded budget votes

WHAT RESIDENTS SHOULD EXPECT FROM ME

Cut waste first. Protect essential services. Show residents the numbers before asking them to pay more.

Current context: The City's 2026 budget approved a 0% increase on the City portion of the property-tax bill plus a 1% levy dedicated to the second-hospital reserve. Peel Region separately sets its tax-supported budget. A Brampton Regional Councillor participates at both levels. [Sources 1, 3-4]

2

IMPLEMENTATION PLAN

SAFER STREETS & SAFER NEIGHBOURHOODS

MY COMMITMENT

I will push for proactive enforcement, safer road design, quicker action on repeat problem properties and evidence-based public-safety funding through Peel Region.

HOW I WILL ACT

- Strengthen proactive by-law enforcement for illegal parking, unsafe property conditions, unlicensed or non-compliant rentals, dumping, noise and repeat problem properties.
- Set clearer 311 and enforcement service standards so residents can see when a file was opened, when action is expected and why a case was closed.
- Use collision, speeding and complaint data to target lighting, crossings, traffic calming, school-zone safety and other road-safety measures where risk is highest.
- Support appropriate police resources through the Regional budget while respecting that Council does not direct individual police investigations or deployments.

FIRST 100 DAYS IN OFFICE

- Create a Wards 2 & 6 map of repeat by-law complaints, high-collision locations and recurring neighbourhood concerns.
- Review Brampton’s proactive enforcement approach and identify what should be expanded, changed or measured more clearly.
- Request a resident-friendly ward dashboard for parking, property standards, rental enforcement, dumping, noise and road-safety files.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Response	Published service standards by complaint type	311 / enforcement dashboard
Repeat issues	Fewer verified repeat complaints at targeted locations	Escalation report
Road safety	Safety improvements at high-risk locations	Collision / project data
Accountability	Status of priority locations visible to residents	Ward progress update

WHAT RESIDENTS SHOULD EXPECT FROM ME

Safety needs more than one response: enforcement, road design, prevention and policing each have a role - and each should be measured.

Current context: Police services are a Peel Regional responsibility, while many by-law, parking and local-road matters are City responsibilities. Peel Regional Police’s 2026 budget included funding for additional officers and civilian staff; operational policing remains independent from individual councillors. [Sources 2, 5]

3

IMPLEMENTATION PLAN

IMPROVE PUBLIC TRANSIT & REDUCE TRAFFIC

MY COMMITMENT

I will push to put transit capacity where demand is highest, improve reliability and connections, and use traffic data to target the bottlenecks that cost residents time every day.

HOW I WILL ACT

- Use passenger-load, pass-by and on-time data to identify routes and trips that are repeatedly overcrowded or unreliable.
- Reallocate or add peak-period service where demand is strongest, and review low-ridership service rather than leaving overloaded routes short of capacity.
- Improve coordination between Brampton Transit and GO schedules and advocate to Metrolinx for service changes when documented demand supports them.
- Prioritize practical congestion measures such as signal timing, transit priority, intersection improvements and road projects based on delay and safety data.

FIRST 100 DAYS IN OFFICE

- Request a Wards 2 & 6 transit heat map showing the most crowded trips, pass-bys, late routes and service gaps.
- Identify quick service changes that can be made in the next scheduling cycle and publish the before-and-after results.
- Prepare a data-backed list of GO connection and capacity concerns for discussion with Metrolinx and the Province.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Crowding	Fewer pass-bys and overloaded trips	Route load reports
Reliability	Improved on-time performance on targeted routes	Quarterly transit dashboard
Traffic	Reduced delay at targeted bottlenecks	Before / after travel times
Connections	Better coordination with GO service	Transfer / schedule review

WHAT RESIDENTS SHOULD EXPECT FROM ME

Service should follow real demand: fewer overcrowded trips, fewer missed connections and smarter use of road and transit capacity.

Current context: Brampton Transit is a City service; GO service is delivered by Metrolinx. Brampton's 2051 Mobility Plan, endorsed in 2025, sets long-range actions for transit, roads, walking and cycling. [Sources 6]

4

IMPLEMENTATION PLAN

DIGNITY & BETTER CARE FOR OUR SENIORS

MY COMMITMENT

I will focus on reliable mobility, age-friendly public spaces, stronger access to Regional senior services and more affordable, accessible housing options.

HOW I WILL ACT

- Push for reliable TransHelp performance and clearer service reporting so riders and caregivers know what standard to expect.
- Support strong Peel seniors services, long-term care, adult day programs, respite and caregiver supports, while advocating for adequate provincial funding.
- Improve age-friendly public spaces through safer crossings, accessible sidewalks, benches, shade, washrooms and better snow/ice response near senior-serving areas.
- Ask staff to cost and assess any proposed expansion of senior transit benefits so a funded, sustainable proposal can be considered transparently.

FIRST 100 DAYS IN OFFICE

- Hold a Wards 2 & 6 seniors and caregivers roundtable focused on transportation, housing, accessibility and service navigation.
- Request a resident-friendly snapshot of TransHelp demand, Regional seniors services and senior-housing projects affecting Brampton.
- Identify priority accessibility fixes around senior residences, transit stops and community destinations.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Mobility	TransHelp and local accessibility performance improves	Service / project reporting
Care supports	Demand and service capacity reported publicly	Peel seniors-services data
Housing	Senior housing projects move through clear stages	Project tracker
Accessibility	Priority barriers identified and addressed	Ward accessibility list

WHAT RESIDENTS SHOULD EXPECT FROM ME

Dignity means being able to move safely, access support, find appropriate housing and age in the community with respect.

Current context: Peel Region provides seniors services and TransHelp and operates long-term-care services. Brampton also provides local transit, recreation, accessibility and public-realm services that directly affect older adults. [Sources 2, 7-8]

5

IMPLEMENTATION PLAN

BETTER HEALTHCARE FOR OUR COMMUNITY

MY COMMITMENT

I will use the municipal tools that are available - funding, approvals, advocacy and public reporting - to keep Brampton’s health-care infrastructure moving, while clearly identifying what the Province and William Osler Health System control.

HOW I WILL ACT

- Protect transparent reporting of the hospital levy and the City’s local-share commitment so residents can see what has been collected, committed and paid.
- Ask for regular public milestones on the Peel Memorial expansion, including development, approvals, construction steps and municipal responsibilities.
- Work to prevent avoidable City-related permitting or infrastructure delays on health-care projects within municipal authority.
- Advocate to the Province and Osler for the operating and capital capacity Brampton needs as population grows, including long-range planning beyond the second hospital.

FIRST 100 DAYS IN OFFICE

- Request a simple public ledger for the hospital levy and local-share commitment.
- Seek a joint public progress briefing on Peel Memorial that separates City responsibilities from provincial, Infrastructure Ontario and Osler responsibilities.
- Bring forward evidence-based long-range advocacy for future hospital capacity in Brampton.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Local share	Hospital levy and commitments reported transparently	Audited / budget reporting
Milestones	Project steps and delays explained publicly	Hospital progress update
City approvals	No avoidable municipal delay	Permit / infrastructure status
Advocacy	Formal actions recorded and followed up	Motions / letters / meetings

WHAT RESIDENTS SHOULD EXPECT FROM ME

I will not claim City Hall controls the hospital system. I will use every municipal lever available and report clearly on who is responsible for the next step.

Current context: Peel Memorial is being transformed into Brampton’s second hospital. Osler says early construction began in 2025 and the project moved into a development phase with a selected construction partner. Plans include a purpose-built 24/7 Emergency Department. Hospital construction and operations depend heavily on provincial and Osler decisions, while Brampton contributes to the local share. [Sources 3, 9]

6

IMPLEMENTATION PLAN

AFFORDABLE HOUSING, GOOD JOBS & OPPORTUNITIES

MY COMMITMENT

I will work to speed appropriate housing, strengthen rental and property standards, support small businesses and connect residents to local job and training opportunities.

HOW I WILL ACT

- Create clearer tracking of housing applications and identify avoidable municipal delays while maintaining safety, infrastructure and planning standards.
- Support affordable, purpose-built rental, supportive and seniors housing where there is a clear public benefit and the project fits infrastructure capacity.
- Run a small-business red-tape review focused on confusing approvals, avoidable duplication and service delays, while strengthening access to the Brampton Entrepreneur Centre.
- Bring employers, training providers, youth, newcomers and community partners together around real vacancies, apprenticeships, entrepreneurship and local career pathways.

FIRST 100 DAYS IN OFFICE

- Request a public tracker for major affordable and rental housing projects showing stage, units, municipal bottlenecks and next decision.
- Meet local small businesses and publish the top municipal barriers they identify to opening, operating or expanding.
- Create a simple guide to current business supports, mentorship, grants and financing resources available through the City and partners.

HOW I WILL MEASURE PROGRESS

MEASURE	WHAT I WILL LOOK FOR	PUBLIC PROOF
Housing	Avoidable municipal processing time reduced	Application / project dashboard
Affordable supply	Projects tracked from approval to completion	Housing project tracker
Small business	Service use and outcomes reported	BEC program results
Jobs	Employment / investment outcomes tied to initiatives	Economic development reporting

WHAT RESIDENTS SHOULD EXPECT FROM ME

Growth should improve daily life: more appropriate housing, safer rental standards, stronger small businesses and clearer pathways to local opportunity.

Current context: Peel Region is responsible for housing services, while Brampton controls local planning, development approvals and economic-development programs. The Brampton Entrepreneur Centre currently offers business training, mentorship and eligible grant opportunities through Starter Company Plus. [Sources 2, 10-11]

Public accountability & official sources

This action plan is designed to be measurable. I would publish regular progress updates showing actions taken, results, delays and next steps.

SIX-PRIORITY PUBLIC SCORECARD

PRIORITY	WHAT I WOULD REPORT	STATUS
1. Taxes & waste	Savings, cost avoidance, major overruns and municipal tax impact	On track / Delayed / Off track
2. Safety	Enforcement response, repeat issues and road-safety actions	On track / Delayed / Off track
3. Transit & traffic	Crowding, reliability, bottlenecks and GO coordination	On track / Delayed / Off track
4. Seniors	Mobility, accessibility, housing and service-capacity progress	On track / Delayed / Off track
5. Healthcare	Hospital levy, municipal approvals and Peel Memorial milestones	On track / Delayed / Off track
6. Housing & jobs	Housing project stages, business support and economic outcomes	On track / Delayed / Off track

IMPORTANT RESPONSIBILITY NOTE

A single Regional Councillor cannot unilaterally deliver every outcome in this plan. Council votes, budgets, staff implementation and - for some priorities - decisions by Peel Region, the Province, Metrolinx, police governance bodies, Infrastructure Ontario or William Osler Health System are required. My commitment is to use the authority of the office fully, report progress honestly and identify who is responsible when action depends on another body.
